

# FINGERSTRING

Hello, peace of mind.

## DISCHARGE PLANNING TOOLS

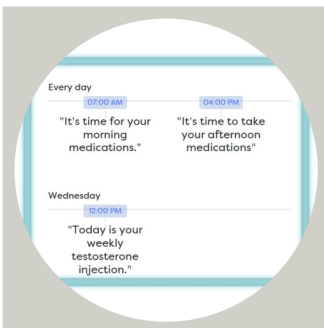

It's been proven that compliance with medications and therapies is the **primary factor** in preventing readmissions within the **crucial 30-day window**.

Our new Discharge Planning tools allow you to set up medication reminders, appointment schedules, and daily check-in calls for your clients preparing to go home.

**FingerString will make automated phone calls supporting even the most complex medication schedules.**

**When you enter their therapy, home visit, and doctor's appointments, we will make reminders calls to help them stay on schedule.**

## Easy, Cost-Effective Tools for Discharge Planning

Medicare payment reductions for 30-day readmissions can significantly impact your bottom line. FingerString's Discharge Planning Tools are budget-friendly, and **preventing just one readmission can more than offset the cost of our service.**

But it's not just about the bottom line. Our service will improve outcomes and quality of life. Patients and their families will have more peace of mind knowing that they have help to make their best recovery possible.

**Reminder messages increase compliance with medications and therapies.**

**Notification calls help patients keep appointments.**

**Daily check-in calls give patients and families confidence they are safe at home.**

**Contact us today to get started**
